

**Electronic Imaging
Materials, Inc.**

Electronic Imaging Materials, Inc. specializes in providing innovative labeling solutions with specialty materials, custom design and variable data printing.

Professional Consultation

We are available to make your labeling process easy and efficient! Our staff of "Label Experts" can help provide labeling solutions, including blank labels formatted to run in existing printing equipment or sold in conjunction with top hardware and software labeling technologies from industry-leading brands like Zebra[®], Motorola[®] Symbol Technologies and Seagull Scientific[™]

Custom Manufacturing

Special tooling and die-cutting capacity to meet detailed format specifications
Finishing options include rolls, sheets and fan-folded labels

Printing of Variable Data, Flexographic & High-Quality Laser Images

We specialize in the most complex variable data printing and provide fast turnaround on all customized label design work
Ask us about our Design-@-Label[™] quick-ship label options!

Specialty Materials

Unique solutions engineered for special labeling applications such as:

- High heat or extreme cold temperatures
- Resistance to harsh chemical exposure
- Abrasion resistance & super durability
- Security & tamper-evident asset labeling

Thermal Transfer Ribbons

We can recommend the best solution with proven ribbon formulations tested in combination with specific materials

Quick shipping for stock sizes in Cable labels, Direct Thermal and Laser printer labels!

Software & Support

BarTender[®] for Windows: User-friendly label design software you can install on a PC
Design your own label formats for on-demand label printing of variable bar code data, UPC labels, human readable text and any other information you choose to output
Technical Support is also available - Call us toll free anytime from 9AM to 6PM

Printers, Hardware & Labeling Equipment:

Thermal Printers

Economical desktop printers plus high-output, industrial grade models
We provide convenient "Quick Start" printing systems to help you to set up for printing your own labels with just the right equipment, rolls of blank label media and thermal transfer ribbons for specific applications

Bar Code Scanners

Short-range or long-range models for 1D and 2D bar code scanning

Label Applicators

Hand-held applicators or electric dispensers to apply large lots easily
